SUMMARY

I am a Software Engineer and Canadian Permanent Resident with experience building reliable, scalable systems across cloud infrastructure, distributed platforms, and mobile applications. I have hands-on experience migrating legacy CI pipelines, developing comprehensive REST APIs, and creating interactive end-to-end customer product experiences within the TypeScript, Go and Python tooling ecosystems. Interested in full-stack software development and network engineering roles.

EXPERIENCE

Event Visionary, Inc.

Software Engineer

Ottawa, ON (Remote)

Aug. 2024 – Present

- Migrated production deployment pipeline from standalone Docker Compose to a clustered Docker Swarm architecture, eliminating deployment-induced downtime and enabling automated rolling updates.
- Architected and co-launched a cross-platform React Native mobile application, integrating real-time state management and optimized rendering pipelines to handle heavy high-frequency interactions.
- Refactored legacy frontend architecture by migrating from CRA to Vite and GitHub Actions, reducing CI/CD build times by 62.5% (from 8+ minutes to under 3).
- Architected an AWS-based SMS marketing engine using Pinpoint and SNS, scaling the platform securely from 0 to 1,000+ active users.
- Optimized cloud resource allocation across EC2 and S3, slashing monthly compute spend by 68% (from \$250 to \$80) while maintaining 99.9% system uptime.
- Built a secure ticket sales and seat reservation engine using SeatsIO and Stripe APIs, alongside AWS Places for geolocation services, successfully processing over \$100,000 in transaction revenue.

Self-Employed, Upwork

Software Developer (Freelance)

Remote

Jan. 2024 – Aug. 2024

- Developed a Generative AI image pipeline using FastAPI and Groq LLM to automate custom T-shirt design workflows, reducing design turnaround time for production clients.
- Built a high-frequency trading bot using Python and IG Markets API, implementing webhook-driven execution with PineScript for real-time strategy signals.
- Deployed and secured a custom SMTP server (Mailcow), managing DNS, SSL, and spam filtering for enterprise email communication.

TECHNICAL SKILLS

Languages: Python, Go, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks: React, React Native, Next.js, Django, FastAPI, Flask, TailwindCSS, Remix

Systems/Cloud: AWS (EC2, S3, SNS, SQS, ECR), Docker Swarm, Docker, Redis, PostgreSQL, Nginx

Tools & Testing: Pytest, Vitest, Git, GitHub Actions, CI/CD, Ruff, Pre-commit

EDUCATION

University of Lagos (First Class Honours; GPA: 4.68 / 5.0)

Bachelor of Science in Computer Science

Lagos, Nigeria

Feb. 2022 – Aug. 2027

EXTRACURRICULARS

NACOSS Tutor (System Design & Analysis)

Lagos, Nigeria

- Selected as a peer tutor to mentor undergraduates on SDLC methodologies, UML modeling, and design patterns, improving student performance in core CS courses.

Competitive Programming

Online / Lagos

- Achieved a peak rating of **Specialist (1421)** on Codeforces; Placed 2nd at DevSprint DSA hackathon (2023 and 2025 editions)
